Cilji in kompetence:

Študent(ka) se seznani s bio-psiho-socialnim modelom zdravja in spozna vlogo psiholoških dejavnikov pri ohranjanju in krepitevi zdravja ust ter psihološke dejavnike, ki vplivajo na sodelovalnost. Na osnovi informacij, pridobljenih vedenj in aktivnega opazovanja študent(ka) odkriva in prepozna pojave in procese, povezane s socialno konstrukcijo realnosti, večinami v medosebnih

Objectives and competences:

The student/s (hereinafter referred to as the student) gets insight into the bio-psycho-social model of health and the role of psychological factors in the maintaining and promoting of oral health and their impact on adherence.

Based on the provided information, obtained knowledge and active (personal) observation, the

odnosih (zlasti komunikacijo), spoprijemanjem s stresom, vezanim na posameznika, referenčne skupine, ki jim pripada, in (med)kulturne dinamike, v katere stopa.

Na osnovi preučevanja literature, študija primerov in lastne aktivnosti opušča prakticistične koncepte v komunikaciji, osveži in nadgradi poznavanje dejavnikov, ki sooblikujejo komunikacijski prostor; nauči se kritično vrednotiti teoretične koncepte in raziskovalne podatke, povezane s psihologijo stresa in socialno percepциjo. Študent(ka) pozna delovanje samouresničajoče prerokbe in zna nadgraditi sodobne raziskovalne podatke s področja socializacije in motivacije s prenosom v uporabne koncepte razgovora v kriznih situacijah. Študent (ka) je vključen(a) v pregled, analizo in razpravo o ključnih konceptih in spoznanjih, povezanih z obravnavo nasilja v medosebnih odnosih; spozna pomen kulture nasilja, vzrokov, razsežnosti in posledic za zdravje, kot tudi možnih in preverjenih odzivov. Seznani se z delovanjem nasilnega diskurza v komunikaciji.

V obliki samostojnega študija, ob pripravi seminarske naloge spoznava strokovno literaturo področja. Predmet zagotovi pregled, analizo in razpravo o ključnih konceptih psihologije zdravja. Učna enota prispeva k razvoju naslednjih splošnih in specifičnih kompetenc:

- ~ sintetično, analitično in ustvarjalno mišljenje in problemsko znanje
- ~ avtonomnost, (samo)kritičnost, (samo)refleksivnost, (samo)evalviranje in prizadevanje za kakovost
- ~ ustvarjanje spodbudnega (učnega) vzdušja, medsebojnih odnosov in učinkovito razreševanje problemov v medosebnih odnosih
- ~ sodelovanje (s sodelavci in drugimi)
- ~ sporazumevanje (besedno in nebesedno)
- ~ spoprijemanje s stresom
- ~ kognitivna empatija
- ~ občutljivost za (so)ljudi in socialne situacije (nasilje v medosebnih odnosih)
- ~ razumevanje in uporaba strokovnega znanja
- ~ raziskovalni pristop in usmerjenost v reševanje problemov.

S študijem literature, primerov in izvedbo praktičnih vaj študenti razvijejo spremnosti in

student detects and identifies phenomena and processes related to the social construction of reality, skills in interpersonal relationships (especially communication) and coping with stress, related to an individual, their groups of reference and (inter) cultural dynamics.

After the study of literature, case studies and their own activities the student will be able to omit implicit/practicistic concepts in communication; refreshes and upgrades knowledge of the factors interacting within the communication field; and learns to critically evaluate theoretical concepts and research data related to the psychology of stress and social perception. The student becomes acquainted with the operation of self-fulfilling prophecies and knows how to incorporate modern research information, with regard to socialization and motivation, into useful concepts of communication in critical and life-threatening situations.

Additionally, the course will provide a forum for the review, analysis and discussion of interpersonal violence; to describe the culture of violence; to make a contribution to understanding of violence and its impacts on health, to illuminate the different types of violence, to advance the analysis of the factors that lead to violence and the possible responses.

In the process of independent work on the preparation of coursework, the student gets to know the body of professional literature. This course will provide an overview, analysis and discussion of the key concepts of health psychology.

The course contributes to the development of general and specific competences as follows:

- ~ Synthetic, analytical and creative thinking skills and problem-solving
- ~ Autonomy, (self-) criticism, (self-) reflexivity, (self-) evaluation and quest for quality
- ~ Creating a supportive (learning) environment, a climate of interpersonal relations and effective problem-solving in interpersonal relationships
- ~ Co-operation (with co-workers and others)
- ~ Communication (verbal and non-verbal)
- ~ Coping with stress
- ~ Cognitive empathy
- ~ Sensitivity to other people and social situations, e.g. interpersonal violence
- ~ Understanding and use of expertise

<p>veščine v medosebnih odnosih, komunikacijske in analitične veščine.</p>	<ul style="list-style-type: none"> ~ Research approach towards professional situations and focus on problem solving. <p>By studying literature, cases and carrying out practical exercises student will develop skills and competence in interpersonal relations, communication and analytical skills.</p>
--	---

Predvideni študijski rezultati:

Znanje in razumevanje: Študent(ka) bo

- ~ razložil(a) pomen in prednost bio-psihosocialnega modela zdravja
- ~ opisal(a) koncept težavne obravnave
- ~ razložil(a) temeljne koncepte psihologije zdravja: sporazumevanje, spoprijemanje s stresom, dejavnikov, povezanih z nasiljem v medosebnih odnosih in osebnim blagostanjem
- ~ razložil(a) dinamiko v komunikacijskem prostoru
- ~ opisal(a) dinamiko v medosebnih odnosih (navezovanje, izguba, žalovanje)
- ~ razložil(a) interaktivno delovanje stresorjev in spoprijemanje

Prenesljive/ključne spremnosti in drugi atributi:

Uporaba: Študent(ka) bo

- ~ uporabljal(a) pridobljeno znanje in veščine v medosebnih odnosih in komunikaciji
- ~ uporabljal(a) konstruktivne strategije spoprijemanja s stresom
- ~ uporabljal(a) tiskane in elektronske vire in samoizobraževanje
- ~ uporabljal(a) nenasilne načine komuniciranja
- ~ oblikoval(a) odnos do sebe in referenčnih skupin, ki jim pripada
- ~ izkazoval(a) zmožnost večkulturnega razumevanja ter kritično razmerje do družbenih in javno-zdravstvenih problemov (nasilja v medosebnih odnosih)
- ~ razvijal(a) veščin v medosebnih odnosih pri sebi in v svojem okolju

Refleksija: Študent(ka) bo

poznal(a) in uporablja(a) proces refleksije in njenega pomena v učenju; zmožnost za refleksijo bo izkazoval(a) v svojem praktičnem ravnanju

Intended learning outcomes:

Knowledge and Understanding: Student will be able to

- ~ explain the importance and usefulness of the bio-psychosocial model of health
- ~ describe/present the concept of difficult patient vs. difficult communication
- ~ explain the basic concepts of health psychology, i.e. communication, coping, interpersonal violence, and personal well-being
- ~ explain the dynamics within the communication field
- ~ describe/present the dynamics of interpersonal relationships, e.g. attachment, loss, separation and grief
- ~ explain the operation of interactive stressors and coping

Transferable/Key Skills and other attributes:

Use: Student will be able to

- ~ apply knowledge and skills in interpersonal relations and communication
- ~ use constructive (active) coping strategies in stressful situations and interpersonal relationships
- ~ use printed and electronic resources in broadening their own body of knowledge
- ~ develop skills in interpersonal relationships and use them in everyday interactions
- ~ use a non-violent approach in interpersonal communication
- ~ develop multicultural understanding and critical insight in social and public health phenomena, e.g. interpersonal violence
- ~ develop self-awareness in self-concept and in relationship with their reference groups

Reflection: Student will:

	become familiar with the process/ability of (self) reflection and its importance in learning; the ability is going to be demonstrated in practical handling
--	---

Metode poučevanja in učenja:

Predavanja, seminarji, vaje, študije primerov, diskusije, individualni in skupinski projekti; individualne konzultacije s predavateljico - poleg predavanj in interaktivnih oblik (diskusije, paneli ipd.) bodo študentje prostovoljno pripravili seminar (projektno nalogu), se posvetovali ob pripravi samostojnih del in v interaktivnem učenju utrjevali veščine komuniciranja in druge veščine v medosebnih odnosih. Del obvezne literature bo predmet panel diskusij.

Learning and teaching methods:

Lectures, seminars, tutorials, case studies, discussions, individual and group projects, individual consultations with the lecturer; apart from lectures and interactive work (discussions, panels, etc.), students will independently prepare a seminar (project work) and will be given the opportunity for consultations during its preparation; during the process, interactive learning ability and communication skills will be strengthened. Part of the mandatory literature will be the subject of panel discussions.

Delež (v %) /

Share (in %)

Assessment methods:

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
<p>Ustni izpit</p> <p>V primeru, da študent pripravi neobvezno seminarško nalogu, mu ta lahko prinese do 30 % ocene na ustnem izpitu</p> <p>Ocenjevalna lestvica:</p> <p>91 – 100 % = odlično (10);</p> <p>81 – 90 % = prav dobro (9);</p> <p>71 – 80 % = prav dobro (8);</p> <p>61 – 70 % = dobro (7);</p> <p>51 – 60 % = zadostno (6);</p> <p>41 – 50 % = nezadostno (5);</p> <p>31 – 40 % = nezadostno (4);</p> <p>21 – 30 % = nezadostno (3);</p> <p>11 – 20 % = nezadostno (2);</p> <p>0 – 10 % = nezadostno (1).</p> <p>Prisotnost na vajah in seminarju je obvezna in predstavlja pogoj za pristop na izpit. Študenti se morajo udeležiti najmanj 80 % vaj in seminarjev, za izostanke pa predložiti (zdravniško) opravičilo.</p>	100	<p>Oral exam</p> <p>In case the student prepares an optional seminar paper, it can bring him / her up to 30% of the grade in the oral exam</p> <p>Grading scale:</p> <p>91 – 100 % = excellent (10);</p> <p>81 – 90 % = very good (9);</p> <p>71 – 80 % = good (8);</p> <p>61 – 70 % = acceptable (7);</p> <p>51 – 60 % = sufficient (6);</p> <p>41 – 50 % = insufficient (5);</p> <p>31 – 40 % = insufficient (4);</p> <p>21 – 30 % = insufficient (3);</p> <p>11 – 20 % = insufficient (2);</p> <p>0 – 10 % = insufficient (1).</p> <p>Attendance at tutorials and seminars is mandatory and is a condition for taking the exam. Students must attend at least 80% tutorials and seminars, respectively; in case of absence a (medical) certificate must be submitted</p>
