Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Prerequisites:

Vsebina: Interdisciplinarni predmet sestavljen iz področij: Otorinolaringologije, Oftalmologije in Onkologije Otorinolaringologija Predavanja zajemajo osnovno znanje na področju otorinolaringologije. Študenti morajo poznati indikacije za napotitev na sekundarni nivo in ustrezno ukrepanje ob urgentnih stanjih v otorinolaringologiji. Posebej ob zapori dihalnih poti in krvavitvah iz ORL področja. Teme : 1. Uho: osnove anatomije in fiziologije sluha in ravnotežja. 2. Nos in obnosne votline: osnove anatomije in fiziologije. Vnetne bolezni in njihovi zapleti, prirojene nepravilnosti, krvavitve, nosna polipoza.	Content (Syllabus outline): Subject “ Clinical Medicine 1” is interdisciplinary, and covers four fields: Otorhinolaryngology, Ophthalmology and Oncology. Otorhinolaryngology Education should include the basic knowledge to provide appropriate levels of primary otorhinolaryngology. Students must learn the indications and need to referral to secondary level. Students should learned importance for urgent condition, like haemorrhage and airway obstruction. Themes: 1. Ear: principles of anatomy and physiology of hearing and equilibrium.
--	---

3. Žrelo. Osnove anatomije in fiziologije. Prirojene nepravilnosti. Hipertrofija limfatičnega obroča. Vnetja in njihovi zapleti.

4. Grlo in sapnik: osnove anatomije in fiziologije. Obstrukcija dihalnih poti. Konikotomija, traheotomija. Zamejene hiperplastične spremembe na glasilkah.

6. Pareza obraznega živca.

8. Vrat: Prirojene ciste in fistule.

Otorinolaringološke preiskave in posegi: otorinolaringološki pregled. Punkcija maksilarnega sinusa, odstranitev tujka iz nosa in žrela. Ustavljanje nosne krvavitve. Konikotomija.

Oftalmologija

Predavanja:

Predavanja morajo zajeti osnovno znanje na področju oftalmologije in zagotoviti primerni nivo primarne očesne oskrbe. Študenti morajo poznati indikacije za napotitev k oftalmologu s poudarkom na nujnih stanjih. Študenti morajo razumeti in poznati znake in simptome očesnih stanj, ki so povezani s pomembnimi sistemskimi boleznimi in diagnozami. Učni pripomočki, vključno z lastno slikovno dokumentacijo, izbrana literatura in ostale publikacije morajo biti zagotovljeni.

Teme:

1. Osnove oftalmologije – normalna očesna anatomija in fiziologija
2. Osnovne preiskovalne metode, anamneza
3. Bolezni vek, solznega aparata in orbite
4. Bolezni veznice, roženice in beločnice. Rdeče oko.
5. Leča in katarakta
6. Bolezni žilnice in očesni tumorji
7. Vitreoretinalne bolezni
8. Človeško oko kot optični sistem, refrakcija.
Refraktivna kirurgija

9. Pediatrična oftalmologija in škiljenje

10. Nevro-oftalmologija

11. Glavkom

12. Poškodbe očesa

13. Očesni znaki pri sistemskih boleznih

14. Nujna stanja v oftalmologiji

15. Ergooftalmologija

Vaje:

namenjene so pridobivanju praktičnega znanja pod vodstvom kliničnega asistenta v majhnih skupinah. Študent se seznani s pomenom oftalmološke anamneze, z oftalmoskopsko tehniko in oftalmoskopsko diagnostiko s posebnim poudarkom na očesno simptomatologijo, osnovnim oftalmološkim pregledom, kliničnim prikazom očesne patologije, povezanostjo z ostalimi vejami medicine, prvo pomočjo v oftalmologiji, izvajanjem nekaterih diagnostičnih postopkov, oceno bolezenskih sprememb, diferencialno diagnozo in terapevtskimi postopki.

2. Nose and paranasal sinuses: principles of anatomy and physiology. Inflammatory disease and complication, congenital malformations, epistaxis, nasal polyposis.

3. Pharynx: principles of anatomy and physiology. Congenital malformations. HAL. Inflammations and complications.

4. Larynx and trachea: principles of anatomy and physiology. Airway obstruction. Coniotomy and tracheotomy. Hyperplastic change of laryngeal mucosa.

6. Paresis of facial nerve

8. Neck: congenital cysts and fistulas.

Investigations and procedures in otorhinolaryngology:

ENT examination. Maxillary sinus puncture. Foreign body removal from nose and pharynx. Treatment of epistaxis, Coniotomy.

Ophthalmology

Lectures:

Ophthalmic education should include the basic knowledge to provide appropriate levels of primary eye care, the students should learn the indications and need for referral to ophthalmologist especially for emergencies. Students should understand the signs and symptoms of ocular conditions that are associated with important systemic disease and diagnosis. Teaching materials, including own clinical photographs, selected readings from existing books and publications will be available.

Themes:

1. Fundamentals and principles of ophthalmology - normal ocular anatomy and physiology
2. Principles of ophthalmological examination, ocular history
3. Diseases of eyelid, lacrimal system and orbit
4. Disease of conjunctiva, cornea and sclera. Red eye.
5. Lens and cataract
6. Uveal disease and ocular tumors
7. Vitreoretinal diseases
8. Human eye as an optical system, refraction. Refractive surgery.
9. Paediatric ophthalmology and strabismus
10. Neuro-ophthalmology
11. Glaucoma
12. Eye trauma
13. Ocular manifestations of systemic diseases
14. Emergencies in ophthalmology
15. Ergophthalmology

Clinical work:

are dedicated to mastering the learning objectives and clinical skills labelled as basic under the supervision of clinical assistant in small groups. The student is informed about the importance of ophthalmological history, ophthalmoscopic examination technique and diagnosis, clinical demonstrations of ocular pathology, illustrative case method study and evidence-based medicine where ophthalmic education is paired with neurology, endocrinology, rheumatology and other field of medicine,

<p>Seminarji: So namenjeni poglobljenemu znanju na posameznih področjih oftalmologije, zahtevajo višjo stopnjo aktivnosti študenta v pedagoškem procesu.</p> <p>Onkologija Splošna onkologija. Biologija, genetika in patologija raka. Epidemiologija in primarna preventiva rakavih bolezni. Kemopreventiva, presejanje (»screening«) in zgodnje odkrivanje raka, prediagnosticiranje. Mikroskopska verifikacija in zamejitev bolezni. Načela kirurškega, obsevalnega in sistemskega zdravljenja raka. Biološki načini zdravljenja raka. Načela kliničnega raziskovanja v onkologiji. Opredelitev ciljev zdravljenja: ozdravitev, remisija, simptomatsko (paliativno) zdravljenje. Multidisciplinarno odločanje, načela multimodalnega zdravljenja in soodločanje bolnika. Urgentna stanja v onkologiji in zapleti onkološkega zdravljenja. Rehabilitacija in ocenjevanje kvalitete življenja. Načela in praktični napotki za paliativno zdravljenje: zdravljenje bolečine, prehrana. Sekundarni maligni tumorji.</p> <p>Specialna onkologija. Raki glave in vrata. Cilji:**Otorinolaringologija**

Otorinolaringologija seznanja bodočega zdravnika z osnovami patofiziologije, pogostimi kliničnimi znamenji, diagnostiko, zdravljenjem in preprečevanjem najpogostejših in za zobozdravnika pomembnimi boleznimi ušes, nosu, žrela in grla. Študenta usposobi za oceno bolezni in določitev, kdaj bo kot zobozdravnik zdravil bolnika sam in kdaj ga bo poslal k specialistu. V sklopu teoretičnega, predvsem pa praktičnega dela, se študent nauči temeljnih otorinolaringoloških preiskav in enostavnejših oziroma nujnih posegov.

Oftalmologija

Cilji: je, da študent medicine spozna osnove anatomije, oftalmološkega pregleda, preiskovalne metode, direktno oftalmoskopijo, glavne vzroke poslabšanja vida, stanja

Objectives:**Otorhinolaryngology**

Students are acquainted with pathophysiology, clinical signs, investigations, treatment and prevention of important ENT diseases. They should be able to assess the disease and decide when to treat the patient by themselves or send him to specialist.

During theoretical and especially practical work student learns about fundamental ENT investigations and simple respectively urgent procedures.

Ophthalmology

Student should understand basic ocular anatomy, principles of ophthalmologic examination, perform direct ophthalmoscopy, understand important causes of

povezana z resnimi očesnimi stanji, ki zahtevajo takojšnjo napotitev k oftalmologu, pomen leukokorije, ambliopije in škiljenja pri otroku.

Onkologija

Na osnovi že prej pridobljenega znanja bo študent zgradil okvir za multidisciplinarno delo v onkologiji. Spoznal bo osnovne smernice za diagnostiko rakavih bolezni, zamejevanje bolezni in odločitev o zdravljenju. Obnovil bo načela kirurškega zdravljenja raka, nato pa se bo posebej posvetil osnovam radioterapije, internistične onkologije in načelom kombiniranega multimodalnega zdravljenja. Spoznal bo osnove rehabilitacije in paliativne onkologije.

Predvideni študijski rezultati:

Znanje in razumevanje:

Otorinolaringologija

- Poznavanje in zdravljenje pomembnejših otorinolaringoloških bolezni.
- prepoznavanje klinične slike
- uvajanje diagnosticnih preiskav
- diferencialna diagnostična presoja
- pravilno usmerjanje ustreznim stomatološkim vejam za nadaljnjo terapijo

Oftalmologija

Študent mora biti sposoben nuditi ustrezno primarno oskrbo očesa in poznati nujna stanja. Poznati mora očesne manifestacije pri sistemskih boleznih kot del edukacije sodobnega zdravnika.

Onkologija

Po uspešno zaključenem programu bo kandidat sposoben razumeti delovanje onkoloških strokovnih skupin, timov, pri diagnosticiranju in tretirjanju bolnikov z rakovo boleznjijo.

Prenesljive/ključne spremnosti in drugi atributi:

Otorinolaringologija

Otorinolaringološka preiskava, osnovni posegi v ORL.

Oftalmologija

Vsek študent mora pokazati znanje na naslednjih področjih :

Določanje vidne ostrine brez in z korekcijo

Pregled gibljivosti zrakla

Ocena vidnega polja z metodo konfrontacije

Razložiti pomen širine zenice in njeno reakcijo na osvetlitev

Pregled sprednjega segmenta s fokalno osvetlitvijo, vključno z evertiranjem zgornje veke

Pregled sprednjega segmenta z biomikroskopom

reduced vision, findings that are associated with serious ocular condition that required immediate ophthalmic care, importance for urgent referral for leukocoria, amblyopia and strabismus in a child.

Oncology

Based on previous acquired knowledge the undergraduate will be able to form his/her frame for the multidisciplinary approach in oncology. The undergraduate's knowledge of basic directive in oncological diagnostics will permit him to assess the degree of disease extension and consequently the appropriate treatment scheme. Based on the acquired knowledge of surgery the candidate will pay particular attention to the treatment with radiotherapy, systemic medical treatment and combined multimodal treatment. Rehabilitation and palliative treatment will be part of the candidates educative programme as well.

Intended learning outcomes:

Knowledge and Understanding:

Otorhinolaryngology

- Knowledge and treatment of important ENT diseases.
- establishing the clinical status
- introducing diagnostic examinations
- differential diagnostic analysis
- right referral to adequate dentistry branches for further treatment

Ophthalmology

Student should be able to provide appropriate primary eye care and to know emergency situations. Understanding of ophthalmic manifestations of systemic diseases is a necessary for the comprehensive education for modern physicians.

Oncology

After a successful completion of the programme the candidate will be able to understand multimodal work of oncological teams in diagnosing and treatment planning of cancer diseases.

Transferable/Key Skills and other attributes:

Otorhinolaryngology

ENT investigation, basic procedures in ENT

Ophthalmology

All students should demonstrate competency in this area:

- Measurement of visual acuity without and with correction,
- Assessment of ocular motility
- Determination of visual field with confrontation technique
- Interpretation of pupillary size and reaction to the light
- Penlight examination of the anterior segment, including upper lid eversion
- Slit lamp examination of the anterior segment

<p>Pregled vidnega živca in zadnjega pola z direktnim oftalmoskopom</p> <p>Odstranitev povrhnjih roženičnih in vezničnih tujkov</p> <p>Sposoben mora biti postaviti naslednje diagnoze:</p> <p>konjunktivitis, katarakt, roženični ulkus, roženični tujek, degeneracijo makule, diabetično retinopatijo, hypertenzivno retinopatijo, glavkom, refraktivno motnjo, očesno travmo, edem papile, hemianoptične in bitemporalne izpade v vidnem polju, akutni začetek paralize III. z ali brez prizadetost zenice, IV., VI.: možganskega živca, akutni začetek škiljenja, leukokorijo.</p>	<ul style="list-style-type: none"> – Examination of the optic nerve and posterior pole – with direct ophthalmoscopy – Removal of superficial corneal or conjunctival foreign body – Student should be able to make following diagnosis: conjunctivitis, cataract, corneal ulcer, corneal foreign body, macular degeneration, diabetic retinopathy, hypertensive retinopathy, glaucoma, refractive error, ocular trauma, papilledema, hemianoptic and bi-temporal visual field defects, acute onset of cranial nerve palsies III. With or without papillary involvement, IV., VI., acute onset strabismus, leukocoria.
<p>Onkologija</p> <p>Na osnovi pridobljenega teoretičnega znanja in praktične izkušenosti se kandidat kvalificira za prenašanje svojega znanja, to je učenja, slušateljem na šolah, kjer je onkologija v programu študija.</p>	<p>Oncology</p> <p>Based on the acquired theoretical knowledge and practical experience the candidate will qualify as a teacher at schools and courses, where oncology is a regular part of schools teaching programme.</p>
