Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
--	----------------

Vsebina:	Content (Syllabus outline):
Biomehanika zoba nosilca. Predprotetična priprava: parodontološki, ortodontski in kirurški posegi za ustvarjanje pogojev za optimalno funkcionalno in estetsko rekonstrukcijo s fiksним protetičним nadomestki. Načrtovanje fiksne protetične terapije. Rehabilitacija stomatognatnega sistema s fiksним protetičnim nadomestki. Krone in mostovi v kombiniranih protetičnih delih. Barva, spektrofotometri. Popolni keramični sistemi, digitalna tehnologija, CAD / CAM, 3D tiskalniki v izdelavi fiksnega protetičnega nadomestka. Estetska rekonstrukcija posameznega zoba in nasmeha s popolnoma keramičnimi sistemi. Estetske loupine. Nekovinski mostovi. Lupe in mikroskopi v fiksni protetiki. Krone in mostovi na implantatih.	Biomechanics of the abutment tooth. Pre-prosthetic preparation: periodontal, orthodontic and surgical procedures in making conditions for optimal functional and aesthetical reconstruction with fixed prosthetic restorations. Planning fixed prosthodontic therapy. Rehabilitation of the stomatognathic system with fixed prosthodontic restorations. Crowns and bridges in combined prosthodontic restorations. Colour, spectrophotometers. Total ceramic systems. Digital technology, CAD/CAM, usage 3D printers in the making of a fixed prosthodontic restoration. Aesthetic reconstructions of teeth and smile with total ceramic systems. Aesthetic veneers. Non-metal bridges. Loupes and microscopes in fixed prosthodontics. Crowns and bridges on implants.

Temeljni literatura in viri / Readings:	
• Shillingburg HT.et al. Fundamentals of fixed prosthodontics, 4th ed. Quintessence Pub. Co. 2012. • HagiwaraY. Color Atlas of Fixed Prosthodontics, Quintessence Pub. Co. 2013.	

Cilji in kompetence:	Objectives and competences:
----------------------	-----------------------------

Cilj predmeta je seznaniti študente s kompleksnimi kliničnimi in laboratorijskimi metodami rekonstrukcije in rehabilitacije s fiksним protetičnim nadomestki s posebnim poudarkom na sodobnih digitalnih tehnologijah, CAD/CAM in 3D izpisih pri izdelavi fiksne protetične zamenjave, kompletnih keramičnih sistemov in implantoprotetične terapije.

Poseben poudarek je na interdisciplinarnem sodelovanju med ekipami zdravnikov različnih specialnosti s ciljem oskrbe zapletenih primerov s področja oralne rehabilitacije.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študent bo sposoben:

- Analizirati fiziologijo in biomehaniko stomatognatnega sistema.
- Analizirati komponente stomatognatnega sistema in opisati način medsebojnega delovanja.
- Oceniti nastanek, smer in učinek žvečilnih sil.
- Analizirati fiksno protetično delo kot terapevtsko orodje.
- Primerjati izbor materialov in vrste fiksno-protetičnega dela glede na trajnost, vzdržljivost, biokompatibilnost in učinkovitost izvedenega zdravljenja.
- Oceniti biološke značilnosti nosilnih zob.
- Določiti načrt fiksne protetične terapije.
- Analizirati vpliv endokrinoloških, imunoloških, onkoloških, metabolnih in kardiovaskularnih bolezni na planiranje, izvajanje in uspeh fiksno protetične terapije.
- Izbrati zobne nosilce in planirati fiksno protetično terapijo.
- Definirati predprotetično pripravo bolnika za fiksno protetično terapijo.
- Analizirati fiksno-protetično delo pri preprečevanju in zdravljenju parodontalnih bolezni.
- Postaviti indikacijo, načrtovati ter analizirati fiksno protetični vidik kombinirane protetične terapije.
- Oceniti uporabo vsadkov kot podlago za razvoj fiksne nadomestne proteze.
- Postaviti indikacijo in izvršiti pripravo za zapletene fiksne protetične konstrukcije: keramične lupinice, inleje, onleje, overleje, endokrone in nekovinske mostove.
- Registrirati medčeljustne odnose v maksimalni interkuspidaciji, sredinski relaciji in ekscentričnem položaju.
- Prenesti modele v polprilagodljiv artikulator ter ga individualizirati.

Znanja in spretnosti so podrobnejše opisane v Katalogu znanj in spretnosti.

The aim of this course is to introduce students with complex clinical and laboratory procedures of reconstruction and rehabilitation with fixed prosthodontic restorations with a special review on contemporary digital technologies, CAD/CAM and 3D printing in the making of fixes prosthodontic restorations, total ceramic systems and implant prosthodontic therapy.

A particular emphasis is given to interdisciplinary collaboration with doctors of different specialties all for the purpose of treating complex cases of oral rehabilitation.

Intended learning outcomes:

Students will be able to:

- Analyse physiology and biomechanics of the stomatognathic system.
- Analyse components of the stomatognathic system and describe their interaction.
- Evaluate the occurrence, direction and activity of masticatory forces.
- Analyse a fixed prosthodontics restoration as a mean of therapy.
- Compare material choice and types of fixed prosthodontic restorations on durability, suppleness, biocompatibility and success of proceeded therapy.
- Evaluate biological traits of abutment teeth.
- Define a plan for fixed prosthodontic therapy.
- Analyse the effect of endocrinological, immunological, oncological, metabolic and cardiovascular diseases on planning, proceeding and success of fixed prosthodontics therapy.
- Choose the abutment teeth and plan fixed prosthodontic therapy.
- Define pre-prosthodontic treatments of the patient for fixed prosthodontic therapy.
- Analyse a fixed prosthodontic restoration in prevention and therapy of periodontal diseases.
- Indicate, plan and analyse the fixed prosthodontic aspect of a combined prosthodontic therapy.
- Evaluate the advisability of using implants as a base for making fixed prosthodontic restorations.
- Indicate and prepare teeth for complex fixed prosthodontic constructions: ceramic veneers, inlays, onlays, overlays, endo-crowns and non-metal bridges.
- Register jaw relations in maximum intercuspidation, centric relation and excentric positions.
- Transfer models in a semi-adjustable articulator and individualise it.

Knowledge and skills are described in more detail in the Catalogue of Knowledge and Skills.
