Languages: Vaje / Tutorial:

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: **Prerequisites:**

Vsebina:

1. Uvod: večdimenzionalna narava bolečine
2. Mehanizmi nastanka dentalne bolečine
3. Ocenjevanje in merjenje bolečine
4. Obravnava bolečine
5. Klinična stanja bolečine v ustih in obrazu

Content (Syllabus outline):

1. Introduction: multidimensional nature of pain
2. Mechanisms of dental nociception
3. Pain Assessment and measurement
4. Pain management
5. Clinical conditions of dental and facial pain

Cilji in kompetence:**Cilji:**

Pridobiti osnovno znanje in veščine za diagnosticiranje in zdravljenje dentalne in bolečine u ustih in obrazu na izčrpen in jasen način.

Kompetence:

Študent bo sposoben opraviti pregled bolnika z bolečino in jo opredeliti po vzroku, patofiziologiji, lokalizaciji in trajanju. Študent bo lahko ocenil bolečino, razumel njen vpliv na kakovost življenja bolnika in bo sposoben oceniti kateri načini zdravljenja so primerni za določeno dentalno bolečino.

Objectives and competences:**Objectives:**

The students will acquire basic knowledge and core skills for diagnosis and treatment of dental and orofacial pain in a comprehensive and coherent fashion.

Competences:

student will be able to perform the examination of patient with pain and to identify pain causes, pathophysiology, localization and duration. Student will be able to measure pain and its implications for the patients' quality of life and will be able to assess the appropriate pain management for the certain dental pain.

Predvideni študijski rezultati:**Znanje in razumevanje:**

- Primarno bodo študenti:

-sposobni pri bolniku ugotoviti in oceniti dentalno bolečino
 -razumeti bolnikovo bolečino iz vseh videzov kakovosti življenja,
 -uporabiti metode analgezije za doseganje učinkovite kontrole bolečine, klasificirati metode izbirnega zdravljenja po stopnjevalni shemi
 -sposobni oceniti učinkovitost določene obravnave bolečine

-prepoznati indikacije in uporabiti primerno psihoterapevtsko zdravljenje

- Delno bodo študenti usposobljeni za prepoznavanje in osnovno specifično obravnavo:

-akutne bolečine v ustih in obrazu
 -bolečine zaradi raka ust in obraza
 -nevropatske dentalne bolečine
 -kronične bolečine,
 -funkcionalnih bolečih sindromov

Prenesljive/ključne spretnosti in drugi atributi:

Predmet omogoča, da študent spozna pomen celostne obravnave bolnika z dentalno bolečino

Metode poučevanja in učenja:**Intended learning outcomes:****Knowledge and understanding:**

- Primarily, students should:

-be able to identify patients with dental pain and measure pain
 -learn to understand a patient's pain and all its implications for the patient's quality of life
 -know and apply the methods of analgesia which offer effective pain control for the majority of patients, and to classify those methods in a graded scheme
 -be able to evaluate the effectiveness of a particular pain management

-know and be able to apply the indications for appropriate psychotherapeutic treatment for pain

- In particular, student should be able to differentiate between and to know the basic principles of specific treatment of main syndromes:

-acute orofacial pain
 -cancer orofacial pain
 -neuropathic dental pain
 -chronic pain
 -functional pain syndromes

Transferable/Key Skills and other attributes:

The course will enable student to recognize the importance of integral dental pain management

Learning and teaching methods:

2025/2026
