| Vsebina: Občutek bolečine in modulacija bolečine. Definicija in vrste orofacijskih bolečin s poudarkom na neodontogeno bolečino. Etiopatogeneza in simptomatologija temporomandibularnih motenj (TMM). TMM diagnostike, TMM terapija z odraslimi, TMM laserska terapija, ultrazvočna terapija TMM. Akupunktura pri TMM terapiji. Farmakoterapija TMM. Fizikalna terapija TMM. | Content (Syllabus outline): Pain perception and modulation of pain. Definition and types of orofacial pain focusing on nonodontogenic pain. Etiopathogenesis and symptomatology of TMD. Diagnostic of TMD. Splints in TMD therapy. Ultrasound in therapy of TMD. Acupuncture in the treatment of TMD. Pharmacotherapy in TMD. Physical therapy of TMD. |

| Cilji in kompetence: Cilj predmeta je pridobiti osnovno znanje o orofacialni bolečini ter diagnostiki in terapiji temporomandibularnih motenj (TMM). Študenti bodo seznanjeni s terapevtskimi postopki zdravljenja TMM s poudarkom na ne invazivnih metodah zdravljenja z namenom odpravljanja simptomov motnje. Cilj predmeta je analizirati uporabo ugriznih opornic, ultrazvoka, laserske, fizikalne in farmakoterapije pri zdravljenju motenj. | Objectives and competences: The aim of the course is to gain basic knowledge of orofacial pain and diagnosis and treatment of temporomandibular disorders (TMD). Students will be familiar with the therapeutic treatment procedures of TMD-s with an emphasis on non-invasive methods of treatment with the purpose of removing the symptoms of the disorder. The aim of the course is to analyse the use of splint, ultrasound, laser, physical therapy and pharmacotherapy in the treatment of disorder. |
|--|---|

Predvideni študijski rezultati:

Znanje in razumevanje:

Definirati orofacialno bolečino in opisati pot prenosa bolečine v orofacialni regiji

Analizirati etiopatogenezo in simptomatologijo TMM

Analizirati diagnostične postopke pri TMM

Opisati vrsto ugriznih opornic in potek njihove priprave

Opisati uporabo laserja in ultrazvoka pri TMM terapiji

Opisati uporabo akupunkture pri zdravljenju TMM

Opisati vključenost fizikalne terapije pri zdravljenju TMM

Analizirati najpogosteje uporabljena zdravila pri

zdravljenju TMM

Intended learning outcomes:

Knowledge and understanding:

Define orofacial pain and describe the pain pathway in the orofacial region

Analyse the etiology, pathophysiology and symptoms of TMD

Analyse the diagnostic procedures of TMD

Describe the type of splint, and the procedure of fabrication

Describe the use of laser and ultrasound in the treatment of TMD

Describe the involvement of physical therapy in the treatment of TMD

Analyse the most commonly used drugs in the treatment of TMD

Načini ocenjevanja:**Delež (v %) /
Weight (in %)****Assessment:**

Način (pisni izpit, ustno izpraševanje, naloge, projekt)
Seminar
 -PPT o dogovorjeni temi
 -30 točk

30%

Type (examination, oral, coursework, project):

Seminar-PPT on chosen topic
 -30 points**Pisni izpit**

Zaključna ocena se oblikuje iz vsote ocene seminarskega dela in pisnega izpita.

70%

Final written examination

The definitive grade is formed from the sum of the marks of the seminar and the written exam.
