

UČNI NAČRT PREDMETA / COURSE SYLLABUS							
Ime predmeta:	Klinična patofiziologija nujnih stanj						
Course title:	Clinical Pathophysiology of Emergencies						
Študijski program in stopnja Study programme and cycle	Študijska smer Study option				Letnik Year of study	Semester Semester	
Biomedicinska tehnologija/3. stopnja					2	3 ali 4	
Biomedical Technology/3rd Degree							
Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)					Izbirni Elective		
Univerzitetna koda predmeta / University course code:							
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS	
15	20	10			135	6	
		AV					LV
Nosilec predmeta / Course coordinator:	Izr. prof. dr. Dušan MEKIŠ						
Jeziki /Languages:	Predavanja / Lectures:		Slovenski/Slovenian				
	Vaje / Tutorial:		Slovenski/Slovenian				
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:						
Vsebina (kratek pregled učnega načrta):	Content (syllabus outline):						
Predmet obravnava fiziologijo in pojasnjuje patofiziologijo nekaterih nujnih stanj, znamenj in simptomov z prikazom primernih kliničnih testov in oskrbo. Pričakovani simptomi in znamenja so predstavljena s specifičnim patofiziološkim procesom. Predmet je razdeljen v štiri dela: 1. osnovna načela patofizioloških procesov 2. patofiziologija srčno-žilnega sistema d patofiziologijo i n oskrbo poškodbe miokarda pri oživljanju in patofiziologija šoka 3. klinična patofiziologija akutnega respiratornega popuščanja in kapnografije 4. patofiziologija hude poškodbe možganov	The subject reviews normal physiology and explains the pathophysiology underlying emergency disease, signs and symptoms, and selection of tests and treatments. Expected signs and symptoms are related to the specific pathophysiologic processes occurring. The subject is divided in four parts: 1. basic principles of pathophysiology 2. cardiovascular pathophysiology with pathophysiology and management of myocardial injury during cardiopulmonary resuscitation and pathophysiology of shock 3. clinical pathophysiology of acute respiratory insufficiency and capnography 4. pathophysiology of severe brain injury						

Temeljni literatura in viri / Reading materials:

- Najnovejši prispevki iz Circulation, Resuscitation, Shock, Chest, Intensive Medicine Care, Critical Care, Critical Care Medicine dostopni preko iskalnika PUBMED in podatkovnih zbirk UKC Maribor in MF UM.
- Vincent JL et al. Textbook of Critical Care. 8th ed., Elsevier 2023
- Koeppen BM et al. Berne & Levy Physiology. 8th ed., Elsevier 2023
- Flood P et al. Stoelting's Pharmacology & Physiology in Anesthetic Practice 6th ed., LWW 2021

Cilji in kompetence:

Znanje osnovnih patofizioloških načel nujnih stanj in sodobnih informacij o novih možnostih oskrbe takšnih stanj. Klinična aplikacija algoritmov (načelo opazovanja in odločanja).

Objectives and competences:

Knowledge of basic principal of patophysiology of some emergencies and up-to-date information about new options for management of emergencies. Application of the philosophy of the algorithms (alternating observation and decision steps).

Predvideni študijski rezultati:
Intended learning outcomes:
Znanje in razumevanje:

Razumevanje in aplikacija algoritmov kardiopulmonalnega oživljjanja. Razumevanje strategije minimaliziranja poškodb po oživljjanju povezanih z uporabo trenutno veljavnih tehnik in seznanjanje z novimi terapevtskimi pristopi za preprečevanje omenjenih poškodb. Znanje monitoringa kritično bolnega bolnika, posebej kapnografije in EKG-a.

Knowledge and understanding:

Understanding and application the algorithms in CPR. Understanding the strategies for minimizing post resuscitation injury associated with current resuscitation techniques and examine novel therapies aimed at minimizing ischemia and reperfusion injury. Knowledge of monitoring critically ill patients, especially capnography and ECG.

Prenosljive/ključne spremnosti in drugi atributi:

Monitoring, tehnike proste venske poti, endotrahealna intubacija, kapnografija, odčitavanje EKG-a, uporaba medikamentov v urgentnih situacijah (volumna resuscitacija, inotropi, vazoaktivna terapija) hitra sekvenčna intubacija, sinhronizirana kardioverzija in zunanja elektrostimulacija). Reševanje scenarije po načelu PBL (problem basic learning)

Transferable/key competences and other abilities:

Monitoring, intravenous access, endotracheal intubation, capnography, electrocardiography and cardiac monitoring, drugs in emergencies (volume resuscitations, inotropes, vasopressors), rapid sequence intubation, synchronised cardioversion, cardiac pacing. PBL scenarios

Metode poučevanja in učenja:
Learning and teaching methods:

Predavanja
Seminarji
vaje (Simulacijski center, samostojno projektno seminarsko delo izbranih poglavji, PBL, ogled in delo na instrumentih)
Samostojno delo

Lectures
Seminars
Tutorial (laboratory work in Centre of simulation, project seminar, PBL, observation and work with instruments)
Individual work

Načini ocenjevanja:
Delež (v %) / Share (in %)
Assessment methods:

Način (pisni izpit, ustno izpraševanje, naloge, projekt)

Method (written or oral exam, coursework, project):

Seminarska naloga

100 %

Seminar paper
