

Univerza v Mariboru

Medicinska fakulteta

UČNI NAČRT PREDMETA / SUBJECT SPECIFICATION

Predmet:	Izbrane vsebine in novosti v genetiki in genomiki medicine
Subject Title:	Selected Topics and Novelties in Genetics and Genomics in Medicine

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
Dentalna medicina/Dental Medicine 2. stopnja/2nd cycle		1	1., 2.

Vrsta predmeta / Course type

Izbirni/Elective

Univerzitetna koda predmeta / University subject code:

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
5	40				45	3

Nosilec predmeta / Lecturer:

red. prof. dr. Uroš Potočnik

Jeziki /

Predavanja / Lecture:

slovenščina/slovene

Languages:

Vaje / Tutorial:

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Content (Syllabus outline):

- genetika in genomika
- genomika in odkrivanje novih zdravil
- asociacijske študije v celotnem genomu (GWAs) za odkrivanje novih genov povezanih s kompleksnimi boleznimi (avtoimunske bolezni, rak, astma, sladkorna...)
- sodobne tehnologije v genomiki: nanotehnologija, mikromreže (biočipi), tehnologija za avtomatsko gensko tipizacije enonukleotidnih polimorfizmov v celotnem genomu (SNPov), sekvenciranje naslednje generacije, masna spektroskopija visoke resolucije (nHPLC-HRMS), Maldi-TOF, 2-D elektroforeza
- funkcijska genomika
- transkriptomika

- genetics and genomics
- genomics in drug discovery
- Genome wide association study (GWAs) in common complex diseases (autoimmune diseases, cancer, asthma, diabetes...)
- modern genomic technologies: nanotechnology, microarrays (Biochips), whole genome genotyping of Single nucleotide Polymorphisms (SNPs), next generation sequencing (NGS), high resolution mass spectrometry (nHPLC-HRMS), Maldi-TOF, 2-D electrophoresis
- functional genomics
- transcriptomics
- pharmacogenomics and toxicology, personalized medicine

– farmakogenomika in toksikologija, personalizirana medicina – fiziološka genomika – primerjalna (komparativna) genomika – metagenomika v medicini – proteomika – bioinformatika: podatkovne zbirke v genetiki in genomiki, programska orodja (za urejanje, analizo in poravnavo nukleotidnih zaporedij, za risanje in segregacijsko analizo družinskih dreves, za statistično genetiko), integracija podatkov-omik; napovedni modeli, sistemska biologija in sistemska medicina; – projekt humani genom projekt HapMap, projekt 1000 genomov – populacijska genetika: velikost in struktura populacije, naravni izbor, mutacije, genetski zdrs, genski pretok, parjenje v sorodstvu; molekularna evolucija, molekularna ura, nastanek genomov – interpretacija podatkov sekvenciranja naslednje generacije za postavitev diagnoze – novi pristopi in uspešni primeri genske terapije – etika v genomiki – Genetika bolezni zob in dlesni s primeri (parodontitisa (paradontoze), karies)	– physiological genomics – comparative genomics – genomics of microorganisms – proteomics – bioinformatics: human genome databases, bioinformatics tools (genome sequence analysis, design and segregation analysis of family tree data, statistical genetics) integration of omic data; prediction models Human genome project, HapMap projects, 1000 genome projects – Population genetics: size and structure of population, natural selection, mutations, genetic drift, gene flow, inbreeding, molecular evolution, molecular clocks, evolution of genomes – From NGS data to diagnosis – New developments and successful examples in gene therapy – Ethics in genomics – Genetics of dental and gum pathology including periodontitis and dental caries

Dopolnilna literatura in viri/ Additional textbooks:

1. Lesk, Arthur: Introduction to genomics, 3rd ed. - New York : Oxford University Press, ISBN 978-0-19-875483-1; 0-19-875483-3; cop. 2017
2. Maitland-van der Zee, Anke-Hilse, Daly, Anne: Pharmacogenetics and individualized therapy; New Jersey : John Wiley & Sons, ISBN 978-0-470-43354-6, 2012

Cilji:

Študenti bodo poglobili razumevanje načinov dedovanja, strukture in primerjave genov in genomov, genske raznolikosti in genetskih napak povezanih z nastankom bolezni. Povdarek bo na prenosu novih znanj in dosežkov genomike, molekularne genetike in biomedicinske tehnologije v klinično prakso na področjih preprečavanja in diagnosticiranja bolezni, načrtovanju in uporabi molekularnih in bioloških zdravil ter individualiziranemu zdravljenju na osnovi genetskih testov. Študentom bodo predstavljene možnosti, prednosti, omejitve, tveganja in etični vidiki uporabe

Objectives:

Student will deeply understand how genes work in health and disease. The focus will be on structure of genes and genomes, genetic diversity and mutation in human genome associated with disease. The focus will be on how can we transfer human genome discoveries and use of genomic technologies into clinical practice for disease prevention, diagnosis, development of novel molecular targeted biological drugs and individualized treatment based on patients genetic and gene expression profiles. Possibilities, advances, limitations, ethical issues and potential risks using genomics in biomedicine will be

tehnologij molekularne genetike in genomike v medicinske namene. Povdarek bo tudi na interpretaciji genetskih testov in genetskem svetovanju pri monogenih in kompleksnih boleznih.

discussed. Examples of interpretation of genetic test and genetic counselling in monogenic and complex diseases will be discussed.

Predvideni študijski rezultati:

Intended learning outcomes:

Znanje in razumevanje:

Delovanje genov in celotnega genoma v zdravju in bolezni

Prenesljive/ključne spretnosti in drugi atributi:

laboratorijske metode in eksperimenti v biomedicini

Knowledge and Understanding:

The role of genes and whole genome in health and disease

Transferable/Key Skills and other attributes:

laboratory methods and experimental techniques in biomedicine

Metode poučevanja in učenja:

Learning and teaching methods:

Predavanja

Seminar

Lectures

Seminars

Načini ocenjevanja:

Delež (v %) / Weight (in %)

Assessment:

Način (pisni izpit, ustno izpraševanje, naloge, projekt)		Type (examination, oral, coursework, project):
seminar	40 %	seminar
pisni izpit	60 %	written examination
ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV:		ACADEMIC OBLIGATIONS OF STUDENTS:
-študenti napišejo seminar na izbrano tematiko in ustno predstavijo seminar s kratkim predavanjem		-students should write an essay on selected topic and give oral presentation (seminar)
-pisni izpit		-written exam
POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA:		REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING:
Opravljen seminar je pogoj za pristop k pisnemu izpitu.		Students should complete seminar in order to approach to the written exam.
